SUMMARY OF CLAIMED SUBJECT MATTER
(37 C.F.R. § 41.37(c)(1)(v))

Independent Claim 1 recites the following:

1. A method for customizing a channel interface, the method comprising:

determining¹ one or both of personal media² and/or broadcast media³ that is to be presented in a media channel;⁴

determining a schedule for presenting said one or both of personal media and/or broadcast media in said media channel;⁵ and

presenting for displaying, at a first geographic location,⁶ said schedule comprising said one or both of personal media and/or broadcast media in a media guide,⁷ wherein said media channel may be pushed from said first geographic location to a second geographic location,⁸ wherein said media guide comprises a plurality of channels,⁹ and wherein one or more of said

plurality of channels may be selected and viewed at said first geographic location prior to pushing said media channel to said second geographic location.¹⁰

Independent Claim 11 recites the following:

11. A machine-readable storage¹¹ having stored thereon, a computer program¹² having at least one code section for customizing a channel interface, the at least one code section being executable by a machine¹³ for causing the machine to perform steps comprising:¹⁴

determining¹⁵ one or both of personal media¹⁶ and/or broadcast media¹⁷ that is to be presented in a media channel;¹⁸

determining¹⁹ a schedule for presenting said one or both of personal media and/or broadcast media in said media channel; and

presenting for displaying, at a first geographic location,²⁰ said schedule comprising said one or both of personal media and/or broadcast media in a media guide,²¹ wherein said media

channel may be pushed from said first geographic location to a second geographic location,²² wherein said media guide comprises a plurality of channels,²³ and wherein one or more of said plurality of channels may be selected and viewed at said first geographic location prior to pushing said media channel to said second geographic location.²⁴

Independent claim 21 recites the following:

21. A system for customizing a channel interface, the system comprising:
at least one processor²⁵ that receives at least one indication of one or both of personal media²⁶ and/or broadcast media²⁷ that is to be presented in a media channel;²⁸
said at least one processor receives at least one indication of a schedule for presenting said one or both of personal media and/or broadcast media in said media channel;²⁹ and
said at least one processor causes said schedule comprising said one or both of personal media and/or broadcast media to be presented for displaying, at a first geographic location,³⁰ in a media guide,³¹ wherein said media channel may be pushed from said first geographic location to
